Main Aims, Objectives and intended Outcomes of the Minerals and Waste Local Plan	
<b>Aims:</b>	The Minerals and Waste Local Plan will set out the strategic policy for minerals and waste development in West Berkshire. The vision for the plan states: “To facilitate the planned delivery of mineral resources and waste management capacity which meet the requirements for West Berkshire in accordance with national planning policy. In particular to plan for the delivery of mineral resources and waste management capacity in locations which meet the needs of West Berkshire in the most sustainable way.”
<b>Objectives:</b>	The plan objectives are:  <b>Minerals</b> 1. To encourage the most appropriate use of all mineral resources and the re-use of recycled minerals and secondary aggregates, having regard to the need to ensure that there is a sufficient supply, whilst maintaining the long term conservation of primary aggregates 2. To attain the principles of sustainable development set out in the NPPF by taking into consideration the demand

	<p>for all mineral resources and the need to protect the quality of life of residents, and protect and enhance the natural, built and historic environment.</p> <ol style="list-style-type: none"><li>3. Where practicable to locate minerals development in appropriate locations in order that the potential negative impact from flooding is minimised.</li><li>4. To maintain a stock of permitted reserves (a landbank) for aggregate minerals, in accordance with current Government advice to ensure an adequate and steady supply of minerals, as far as is practical, from outside the North Wessex Downs Area of Outstanding Natural Beauty, Scheduled Monuments and Conservation Areas.</li><li>5. To identify sites for future mineral extraction which will provide for the continued extraction of minerals, having regard to the need to avoid demonstrable harm to interests of acknowledged importance.</li><li>6. To prevent the unnecessary sterilisation of proven mineral resources by other forms of development and to safeguard existing and planned rail head sites together with existing and planned concrete batching facilities, coated road stone manufacturing facilities and sites that handle, process and distribute recycled and secondary aggregates.</li><li>7. To provide for the recovery and reuse of aggregate from construction and demolition waste in order to reduce the requirement for new primary resources to a minimum.</li><li>8. To ensure that mineral sites are progressively restored at the earliest opportunity to a high standard, beneficial and viable after-use that delivers meaningful measurable net gains for biodiversity, including the establishment of coherent ecological networks.</li></ol> <p><b>Waste</b></p> <ol style="list-style-type: none"><li>1. To seek to prevent the generation of waste arisings at source, and to support and encourage initiatives designed to achieve this.</li><li>2. To increase the overall waste management in West Berkshire in line with the Waste Hierarchy through the provision of capacity for the re-use of waste materials, the preparation for the reuse of materials, the recycling of waste and the recovery of materials that cannot be recycled and to minimise the quantities of residual waste needing final disposal while recognising that this will continue to be required.</li><li>3. To provide a flexible approach to the delivery of waste management facilities of appropriate capacity and type to achieve net self-sufficiency within the West Berkshire area.</li><li>4. To enable the delivery of the West Berkshire Waste Management strategy and increase the proportion of waste managed further up the waste hierarchy.</li><li>5. To locate waste management facilities so that wherever possible they minimise the distances that waste is transported for management and disposal, and to minimise adverse traffic effects of waste management</li></ol>
--	--

	<p>development.</p> <ol style="list-style-type: none"> <li>6. To safeguard existing waste management facilities, which are appropriately located, from competing forms of development that might otherwise constrain their continued operation or lead to their loss.</li> <li>7. To ensure appropriate protection of the quality of life of those who live and work in West Berkshire from the adverse effects of waste management related development.</li> <li>8. To ensure appropriate protection and enhancement of the natural, built and historic environment in West Berkshire from the adverse effects of waste management related development in accordance with the NPPF.</li> <li>9. Where practicable to locate waste development in appropriate locations in order that the potential negative impact from flooding is minimised.</li> </ol> <p>The plan objectives were subject to EqIA in 2013 as part of the Issues and Options consultation. It was concluded at that stage that the Minerals and Waste Local Plan 'Issues and Options' have very limited relevance to equality issues, particularly considering that it was very unlikely that the resulting impacts on persons with the nine protected characteristics would differ in any way from any other interested party.</p>
<b>Outcomes:</b>	<p>Delivery of the Minerals and Waste Local Plan for West Berkshire to guide development of minerals and waste sites over the plan period to 2037.</p>
<b>Benefits:</b>	<p>The Minerals and Waste Local Plan has been positively prepared to guide development of minerals and waste sites in West Berkshire to 2037. This will provide developers, land owners and members of the public certainty as to where sites are likely to be developed as well as setting out the criteria by which sites will be assessed when considering whether it would be appropriate to grant planning permission. The plan will enable essential minerals extraction, and waste management facilities to increase recycling and divert waste from landfill.</p>

## Equalities Impact Assessment

The Objectives of the Plan were subject to EqIA as part of the Issues and Options consultation in 2013. The following tables carry out the EqIA of the Preferred Options stage of the development of the West Berkshire Minerals and Waste Local Plan as well as all the policies proposed within the plan. The EqIA has subsequently been updated to reflect the changes to the plan since the Preferred Options Consultation.

<b>General Comments:</b>		
<p>It is not considered that the impacts of this policy on persons with the nine protected characteristics will differ in any way from any other interested party, therefore, there will be no adverse impacts on equalities or discrimination with regard to the protected characteristics.</p> <p>It is considered that without a specific flooding policy within the Minerals and Waste Local Plan there could have been potential for the impacts of flooding to impact on different groups, particularly the elderly or those with a disability. However, the policy requires minimisation of impacts and consideration of mitigation measures to ensure that overall flood risk does not increase as a result of development, and in many cases improves, therefore, it is not considered that there will be a different impact on people based on their age or disability.</p>
