I would like to know how many local residents are on the West Berkshire Planning committee? In my experience consultations of this type receive more attention from those likely to gain financially from proposed plans!! I have no doubt the plans take into account the additional schools, doctors and dental surgeries and retail park. However, the massive increase in number of motor vehicles will most definitely require a railway bridge in Thatcham and a north Thatcham bypass. To fully understand this need you need to be a local frustrated resident. Hence my first sentence. Thank you. Clive Beal
