Hello,

I see that west Berkshire council are still not listening to the people that live in the area where you are planning to build a huge housing estate in Thatcham on green belt land, this will heavy impact on the residents that already live in this area. There are too many houses already in Thatcham and too many cars traveling in Thatcham at peak times. You will be creating more flooding in an area that is already prone to flooding. With all the houses you have already built in Thatcham there has been no new infrastructure with wait times for a Doctor's appointment is weeks. The Doctors in our surgery are coming from other surgery's to fill in. The schools catchment areas are getting bigger and bigger and with a shortage of Teachers this will be devastating for children that are already being taught in the local schools with bigger classes.

Kind regards  
Mr Mildenhall
