To whom it may concern:

We are completely against this development. The infrastructure around Thatcham cannot cope with a development of this size. There isn't adequate provision of doctors, parking at the train station, schools to name but a few. The roads around Thatcham and the impact the increased traffic would have on Bucklebury cannot cope. Not to mention the impact on the environment, wildlife and countryside. This development will ruin the local area. There must be a better solution to building more homes or just scale down the development dramatically. This is a corrupt development being rushed through planning.

Yours sincerely

David and Emily Mumby
