Hi,

I am writing to confirm my object to both the planning “on the land east of Pincents Hill” and the proposal to extend the Tilehurst settlement boundary.

### **Pincents Hill**

- It has been shown time and time again that this is not suitable for development
- The area has very little green space left
- The area is already overpopulated
- The local road networks already cannot cope
- The local facilities cannot cope, with no doctor appointments available for weeks.
- You closed down the last hospital and built blocks of flats on it.

### **Extending the settlement boundary**

- The local area cant expand any more, filling in the gaps between the motorway and the reast of Reading is a stupid idea. No green spaces will remain and the entire settlement will just be one tarmac slab.
- Boundary settlements already experience flooding.
- Already experienced gridlock
- Are already overpopulated
- Not enough school places
- Not enough healthcare places
- RBH hospital was on the new last week saying they are at capacity and cannot cope and are not getting the building updated for another 10 years.

### **Democracy**

- This proposal has been voted on and denied many times over, it is not democratic to keep slinging the same mud, dressed up slightly differently until some of it sticks.
- This entire process has been questionable from start to finish.
- I know it's going to happen anyway, you put in the pipework for it over 10 years ago. Be different, show some integrity.
